

CERTIFICAT OF DECONTAMINATION

This document must accompany any equipment returned to Optimex for maintenance.
Your model can be accepted if it gives all the information requested below.

This document must be accompanied with the safety data sheet (MSDS) of any pumped products.

Please note the fact that, for obvious safety reasons, no dismantling of the equipment will start before receipt of these documents.

COMPANY:

ADDRESS:
.....

EQUIPMENT:

SERIAL NUMBER:

PRODUCT OF PROCESS:

Precautions in relation to the product:

- This equipment was not installed
- This equipment has been decontaminated: cleaned and free from any dangerous material
- This equipment has not been decontaminated. In this case, Optimex can refuse the equipment or put it into quarantine until a joint solution is found satisfactory.

Despite decontamination of the equipment, the design of the machines can lead, following an incident, to areas of liquid retention.

Please indicate the special PPE to be used according to the liquid pumped (material, category, etc.):

.....
.....
.....

NOTERA: if PPE specific to your process are used, please supply us with them.

We confirm this information to be correct and complete.
